Gardening on Cape Cod

For nearly sixty years, it has been our pleasant privilege to supply a substantial number of Cape Cod homes, both summer and year-round, with whatever horticultural requirements they may have had.

Through the years, it has been our purpose to build and maintain a complete horticultural service, combining Hardy Plant materials from our Nurseries, Annual and Bedding plants from our Greenhouses and seeds, fertilizers, insecticides, tools and gardening equipment from our Agricultural Supply Shop.

Along with these, we have offered a capable Landscape Service, with ample labor forces for actual planting, grading, seeding, driveway construction and similar work on the grounds, and with trained landscape architects to advise, plan and supervise.

Today, in spite of these troubled times, our combined horticultural service is functioning at full capacity and ready and anxious to help in every possible way. Labor, of course, is short and we are unable to do nearly as much as we should like, but we do have a sizable, permanent force of loyal workmen, whose long experience with us permits us to accomplish much good work.

The hurricane of September, 1944, ruined many trees and plantings throughout southern New England, and created new problems of replanting and replacement. On page 15 we offer specific suggestions in this connection.

Gardening on Cape Cod will always be a source of continuing pleasure, not only to homeowners themselves, but also to those of us who are interested in doing our best to make it successful.

H. V. Lawrence, Inc.,
The Cape Cod Nurseries,
Falmouth, Mass.

Hardy Perennials

All perennials 35c each, \$3.60 per dozen, unless otherwise noted. Plants priced more than 35c each will be sold at the rate of 12 plants for the price of 10. Six or more of one variety sold at the dozen rate.

Royal Robe. Fine large deep violet flowers. 10-12 in.
summer. 40c each. All

YUCCA

filamentosa. Creamy-white spikes. 4-6 ft. June-July. 35c each.

Herbs

Victory gardening has brought increasing interest in these useful and attractive plants. They are easily grown, and give both fun and flavor.

Prices, 35c each, \$3.60 per dozen

American Burnet. Used in salads.

Chives. Leaves used for onion flavor.

Lavender. Dried flowers make fragrant sachets, etc.

Mints. Applement, Peppermint, and Spearmint. All widely popular.

Parsley. Leaves used for garnishing.
Rosemary. "For Remembrance." Used in cooking and medi-

Sage. For seasoning stuffing, sausage, soups.

Winter Savory. Used in salads, stuffing, gravy.

Thyme. For flavoring sauces and vegetables. Lemon Verbena. Delicious fragrance. Used as lemon flavoring.

Rose-Scented Geraniums. Several fine varieties.

Price: 35c each, \$3.60 per doz., except as noted.

Hybrid Tea Roses

Roses are very scarce this year. Labor shortages throughout the country have drastically curtailed propagation. Few if any of the patented varieties are offered anywhere. We feel we are fortunate to be able to offer the kinds listed below. All we have are top-quality, 2-year, No. 1 grade, field grown. If our dormant stock is sold out, we shall supply pot-grown plants. Likewise, some substitutions may occasionally be necessary, in which cases we will select colors as nearly like the variety ordered as possible.

Dormant plants, \$1.25 each, \$12.50 per dozen 1.50 each, 15.00 per dozen Potted plants,

Ami Quinard. Rich velvety maroon, fragrant.

Autumn. Burnt orange shaded red.

Caledonia. Snowy white, large pointed buds.

Christopher Stone. Exceptionally fine scarlet-crimson. Editor McFarland. Glowing pink.
E. G. Hill. Large, dazzling scarlet.

Etoile de Hollande. Beautiful true-red.

Frau Karl Druschki. Old favorite large-flowered white.

Joanna Hill. Large deep yellow.
Kaiserin Auguste Viktoria. Beautiful creamy-white.
Lady Ashtown. Carmine-pink with yellow undertones.
McGredy's Scarlet. Brilliant scarlet based orange.

Miss Rowena Thom. Rose and old gold. Mrs. Charles Bell. Fine clear shell pink. Mrs. E. P. Thom. Canary yellow.

Soft pink. Pink Pearl.

President Herbert Hoover. Copper-red, orange and gold. President Macia. Bright carmine-pink, two-tone effect. Red Radiance. Clear watermelon red.

Roslyn. Deep golden yellow. Red and gold. Talisman.

Clean white. White Killarney.

Climbing Roses New and Patented Varieties

Dormant field-grown plants \$1.50 each, \$15.00 per dozen Potted plants \$1.75 each, \$18.00 per dozen All 2-year, No. 1 grade

Coppery apricot-pink.

Apricot Glow. Coppery apricot-pink Blaze. The everblooming scarlet-red.

Copper Glow. Deep coppery-orange.

Doubloons. Large rich yellow, very hardy.

Golden Climber (Mrs. Arthur Curtis James). Called "the supreme yellow rose." Very strong.

New Dawn. The everblooming Van Fleet; beautiful shellpink, very prolific.

General List of Climbers

Dormant field-grown plants \$1.25 each, \$12.50 per dozen Potted plants \$1.50 each, \$15.00 per dozen All 2-year No. 1 grade

American Pillar. Deep crimson-pink, white center.

Climbing American Beauty. Double rose-pink.

Dorothy Perkins. The favorite clear pink rambler. Dr. W. Van Fleet. Beautiful flesh-pink. Dr. W. Van Fleet.

Excelsa. Improved crimson rambler.

Gardenia. Ŷellow buds opening to cream. Mme. Gregoire Staechelin. The "Spanish Beauty." Very

large clear pink.

Mary Wallace. Large semi-double bright pink.

Brilliant semi-double scarlet. Paul's Scarlet. Brilliant semi-double scarl Silver Moon. Huge creamy-white, single.

Tausendschoen. Old favorite, shell-pink.

Polyantha Roses

The low-growing, everblooming bush roses. Always popurand effective. Very hardy. All 2-year, No. 1 grade, fieldlar and effective. grown plants.

Dormant plants, \$1.25 each, \$12.50 per dozen 1.50 each, 15.00 per dozen Potted plants,

Gloria Mundi. Brilliant salmon-orange clusters.

Ideal. Darkest red flowers, dark foliage.

Lafayette Improved. Large semi-double flowers of light crimson-pink.

Triomphe Orleanais. Clusters of bright cherry-pink flowers.

Deciduous Flowering Shrubs

LOWERING SHRUBS offer perhaps the greatest and 'quickest return on a small investment. Prices of good-sized shrubs are low. Plants grow quickly, provide a wealth of flower, and often most attractive fruits.

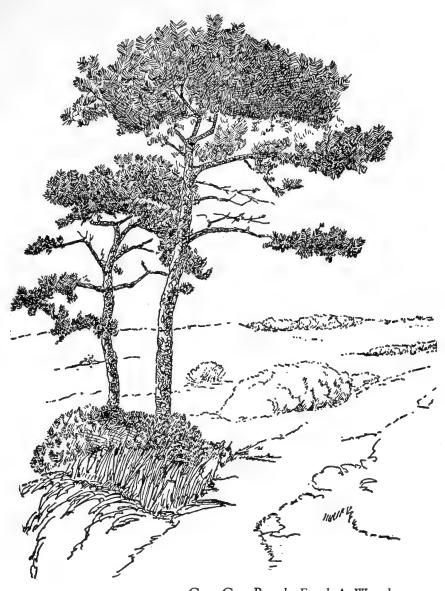

For immediate effects, the following list includes many kinds in large sizes, from 5 to 8 feet high. These are in fine condition.

For late spring and early summer planting, shrubs in full leaf, even in flower, may be moved with a ball of earth. A small extra charge for balling and burlapping such plants gives added insurance of their success.

	Each	Dozen

CAPE COD PINE by Frank A. Waugh

For Hurricane Replacement Plantings

Losses of trees and other plants caused by the hurricane of September 14, 1944, were admittedly severe and tragic in many places throughout southern New England.

Where the devastation was most serious, the imperative need is for large-size trees, evergreens, and full-grown shrubs, to restore a semblance of the former beauty, shade, protection and seclusion.

We are especially fortunate in having in our own Cape Cod Nurseries a substantial quantity and varied selection of such extra-size materials, all in fine condition to be successfully transplanted to fill your needs.

In many other cases, homeowners will prefer to make a new start, using vigorous young plants of well-chosen kinds of trees and shrubs that will give great pleasure and satisfaction as they grow and

For your convenience we are listing here part of the many kinds and sizes available in our nurseries for immediate planting. Prices are quoted in the corresponding sections in this catalogue, under Trees, Evergreens, Flowering Shrubs, etc.

Large Plants for Immediate Effect

EVERGREENS:

Arborvitaes (Thuja), of several varieties, up to 14 feet high. Retinosporas, or False-cypress (Chamaecyparis), several kinds, up to 16 feet.

Blue Spruces (Picea), 10 to 14 feet.

White Spruces (Picea), 6 to 8 feet.

White Firs (Abies), 6 to 8 feet.

Scotch and Red Pines, up to 10 feet, medium grade, good for massing.

Japanese Black Pines (Pinus thunbergi), the one best tree for salt-sea-wind exposures; a fine lot of heavy trees up to 7 to 8 feet.

Native Pitch Pines (Pinus rigida), fine nursery grown trees up to 7 feet.

Chinese Dragon Spruces (Picea asperata), broad-growing type, particularly good for seashore; 5 to 6 feet.

Tiger-Tail Spruces (Picea polita), stiff resistant growth, specimens up to 8 feet.

DECIDUOUS SHADE TREES:

European Lindens (Tilia), extra heavy, beautiful specimens up to 15 feet.

European Beeches (Fagus), exceptionally fine low-branched, broad specimens up to 20 feet high.

Norway Maples (Acer), up to 14 feet; a few larger ones.

Elms, Moline (Ulmus), a good supply up to 14 feet; some others up to 20 feet.

Carolina Poplars (Populus), broad-headed trees; 10 to 12

Pin Oaks (Quercus), excellent young trees up to 12 feet.

White Birches (Betula), up to 10-12 feet; a few much larger.

FLOWERING TREES:

White Flowering Dogwood (Cornus florida), many heavy 6 to 8 foot plants, and several beautiful mature specimens up to 12 feet high, very broad and full.

Kousa Dogwood (Cornus kousa), fine later-blooming variety, many 5 to 6 foot plants, and several excellent large specimens up to 16 feet high.

Washington Hawthorns (Crataegus cordata), a particularly good block of heavy trees up to 12 feet.

Flowering Crab-Apples (Malus sargenti), broad, stocky trees 6 to 8 feet high.

Horse Chestnuts (Aesculus), heavy trees up to 12 feet.

Yellow-wood (Cladrastis), broad, low-branched, up to 12

Tree-Lilac (Syringa japonica), up to 8 feet.

Purple-Leaf Plum (Prunus), extra bushy specimens, 8 feet.

LARGE FLOWERING SHRUBS:

Russian Olive (Elaeagnus), excellent for seashore exposures; up to 7 to 8 feet, very broad.

Red-Vein (Enkianthus), unusual and rare; fine specimens up to 7 to 8 feet.

Deutzias, heavy, up to 6 feet.

California Privet (Ligustrum), bushy unclipped plants up to

Forsythias, up to 6 feet.

Bush Honeysuckles (Lonicera), heavy broad plants up to 7 to 8 feet.

Mock Oranges or Syringas (Philadelphus), heavy, up to 8 feet.

Lilacs, French Hybrids (Syringa), in several varieties, up to 8 feet.

Weigela, pink-flowering, up to 6 feet and broad.

Viburnums, several varieties, up to 6 to 7 feet.

Silverbell (Halesia), bushy, 6 to 8 feet.

Vigorous Young Plants

for Hurricane Replacement Plantings

EVERGREENS (all balled and burlapped):

White Spruces (Picea alba), 3 to 4 feet.

Norway Spruces (Picea excelsa), 3 to 4 feet.

Red Pines (Pinus resinosa), $2\frac{1}{2}$ to 3 feet.

Scotch Pines (Pinus sylvestris), 2 to $2\frac{1}{2}$ feet.

Austrian Pines (Pinus nigra), 2 to $2\frac{1}{2}$ feet. White Pines (Pinus strobus), 3 to 4 feet.

Red Cedars (Juniperus virginiana), fine nursery-grown, 2 to 3 and 3 to 4 feet.

SHADE AND ORNAMENTAL TREES:

Red (Swamp) Maples (Acer rubrum), 9 to 10 feet.

Norway Maples (Acer platanoides), 8 to 10 feet.

White Birches (Betula alba), 5 to 10 feet.

Flowering Dogwood, White (Cornus florida), 3 to 8 feet.

Flowering Dogwood, Pink, 2 to 4 feet.

Kousa Dogwood (Cornus kousa), later blooming, 4 to 6 feet.

European Beeches (Fagus sylvatica), 5 to 8 feet.

Pin Oaks (Quercus palustris), 8 to 10 feet.

SEEDLING PINES:

Husky young transplants, not tiny seedlings but 5 to 6-year trees, excellent for planting on slopes, and for recreating woodland groves. These will move with bare roots, and if handled with reasonable care will give excellent results at low cost.

 $1\frac{1}{2}$ to 2 ft., per 100, \$ 75.00. 2 to $2\frac{1}{2}$ ft., per 100, 100.00. Japanese Black Pines,

Scotch Pines, 2 to 4 ft., per 100, \$100.00.

Red Pines, 2 to 3 ft., per 100, \$75.00.

About Planting in General

THREE main factors contribute largely to success with all plantings, large or small.

- 1. Select the kind and grade of plants most suited to the proposed location, and best fitted to fulfill the desired purposes.
- 2. Have the ground well prepared, before planting starts, with adequate good fertile soil to the full depth needed.
- 3. See that new plants especially get the best of care, from the hour you receive them, during the actual planting, and all through the first growing season particularly.

Making the right choices of kinds and quality of plants is important. If your conditions of soil and exposure are difficult, a reliable landscape consultant will save you time, money, and disappointment. Particularly in cases of severe sea-wind exposures, many kinds of plants that would be eminently successful in more sheltered spots simply cannot withstand the almost constant drying, salt-laden winds off the water. But there are kinds that will survive in such exposures. Japanese Black Pines and Rugosa Roses are two good examples. We believe that our long experience and gratifying success in sea-exposure planting enable us to give you sound and reliable advice.

Proper preparation of the ground is urgently important. Without it, long-range success and satisfaction are almost impossible. It is easy to assume that because our big hurricane-felled pines were living in "almost pure sand," new pines of fair size will thrive and grow when planted in the same sandy soil. But the large native pines started in that sand as tiny seedlings, and fought their way upward only after the roots had first gone downward far enough to supply their needs. To overcome the inevitable shock of transplanting sizable plants, we must first provide ample good soil that holds food and moisture to enable prompt "rehabilitation" of the plants in their new environment. A fair proportion of any investment in planting should go first into adequate soil preparation.

Reasonable care of new plants, large or small, is sound common sense. Yet too often it is neglected. Watering is of greatest importance. One or two thorough soakings of the ground in a week is far better than a light sprinkling daily. Trees of fair size should be securely staked to prevent swaying in the wind which tends to loosen and dry the soil, and to break off new young feeder roots as they form. Good plants must have reasonably good care for at least the first season after planting. They deserve it all the years of their lives.

Planting Seasons

All hardy plants (except such bulbs as tulips, narcissus, etc.) are planted in this section from about April 1 on through the whole spring.

Planting of evergreens may also be done from late August through October.

Most hardy perennials may well be planted during the fall months.

Late fall planting of most deciduous trees and shrubs is very satisfactory, and promotes an early start the following spring.

Large trees, both evergreen and deciduous, are successfully transplanted with a frozen ball of earth during the winter.

Landscape Service

You are invited to take full advantage of our competent Landscape Service, which combines capable labor forces for doing the actual work, trained landscape advisers for planning, advice and supervision, and a full supply of plants and gardening materials, including fertilizers, loam, manure, insecticides and tools.

Lawns

Y/E CARRY a complete line of only the better grades of grass seeds and fertilizers suitable for use in this area. It pays to use only first quality materials.

Lawns should be fertilized early each spring, and in some cases a second light application is advisable

in early fall.

New lawn seeding can be done in early spring, but the one best time of the year is the early part of the fall.

Victory Gardening

So satisfying have been the returns from home-raising of vegetables and fruits in the wartime Victory Garden Program that we are sure it will continue for many years to come. A complete line of the very best quality vegetable seeds and Victory Gardening fertilizers is offered in our shop on Depot Ave., Falmouth.

Particularly satisfactory are the thousands of sturdy vegetable plants which we raise each spring in our greenhouses and frames. Properly planted, they will give you abundant production from early

summer through to late fall.

If you have not already received your copy, we will gladly send, on request, our catalogue of Victory Garden Seeds, plants and fertilizers.

CULTIVATED HYBRID BLUEBERRIES

Used more widely every year, and deservedly so, because of their great productivity of large sweet fruits. The naturally acid soils of southeastern Massachusetts are particularly favorable for these Blueberries.

We offer the three varieties proven most satisfactory in this

section, all Cape-grown:

Cabot. The earliest to ripen.
Pioneer. Later sort, more spreading growth.
Rubel. The best all-purpose variety.

Information for Customers

ALL OUR STOCK is guaranteed true to name, in good condition, carefully dug and properly packed for safe shipment.

Plants are perishable, living organisms. It pays to treat them well, and success depends on correct planting methods, good soil conditions and proper after-care. Also much depends on the selection of varieties suitable for specific locations and conditions of light and wind exposure. This is especially true near the seashore, and our long experience with such problems is an added advantage of our service.

Six, or more, plants of the same variety are sold at the dozen rate. Twenty-five or more at the onehundred rate. Although not listed in this catalogue, one-hundred rates will be granted wherever possible. All prices quoted are F.O.B. our nurseries in Falmouth. Parcel Post, express and freight charges are paid by the purchaser. Truck deliveries within a normal radius will be made without charge when they may be included on our regular delivery trips. Wartime regulations eliminate all special deliveries. Deliveries of full truck loads to any point may be arranged at cost.

We are closed to business on Sundays.

We shall appreciate the consideration of our customers that, like every civilian business in these times, we have contributed our share of men to the armed forces, and there may be occasional inevitable delays. We shall do our utmost to maintain satisfactory service.

To Our Customers:

Because the September hurricane necessitated postponement of practically all new fall landscape work until this spring, and because of the exceptional number of additional orders received during the early spring, we are regretfully obliged to say that we cannot accept and agree to fulfill before July first any more orders of a type involving our labor forces.

We will gladly accept orders for all nursery stock to be called for or to be delivered by us to the customer and planted by him, and fill such orders as promptly as possible in the order of their receipt.

We invite and encourage ordering and planning early for planting and general landscape work to be done next fall.

We respectfully ask the consideration of our customers, until such time as more ample labor forces are available.
